***Election/Restrictions***

1. Applicants' representative called the Examiner to note the Requirement mailed September 30, 2009 was not based upon the proper claim set, see accompanying Interview Summary. The claim set was amongst documents submitted with the additional 371 forms on May 4, 2006. The latest claim set was submitted as an amendment filed under article 34 and that is the claim set that the Requirement should be based upon. The former Requirement has been vacated in lieu of the instant Requirement.

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-13 and 15-41, drawn to a method of preparing an antigen-nanoparticle conjugate and an antigen-nanoparticle conjugate comprising a plurality of carbohydrate antigens conjugated to a nanoparticle.

Group II, claim(s) 43-50 and 52-76, drawn to a method for inhibiting metastasis of carcinoma cells comprising administering an antigen-nanoparticle conjugate.

3. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature recited in claim 1, a method of preparing an antigen-nanoparticle conjugate is distinct from the method of administering an antigen-nanoparticle conjugate to a subject or cells. These two different methods read on distinct and diverse processes. The first Group reads on an *in vitro* assay, whereas the second Group reads on an *in vivo* assay. The two different method groups differ in method steps, reagents and yield different method endpoints, hence the technical feature recited in claim 1 is not special.

Accordingly, the groups are not so linked as to form a single general concept under PCT Rule 13.1.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
6. The Examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not

commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
